#### **History and description of the remains**

At an unknown date, human remains representing, at minimum, one individual were removed from the Flucke site (47CR3) in Crawford County, WI. The Flucke Site is located at the edge of the Prairie du Chien Terrace, overlooking the confluence of the Wisconsin and Mississippi Rivers. It is on the east side of the Mississippi River and the north side of the Wisconsin River. The multi-component site comprises a mound group which once contained at least 15 conical mounds, one linear mound, and a two-acre habitation site. In the 1880s, five of

the mounds were excavated by the Bureau of American Ethnology. By 1972, the mound group had been leveled. The human remains in the UW Department of Anthropology were collected from the surface of the site by avocational archeologist Al Reed and donated to the Department. The remains consist of a partial cranial fragment belonging to an adult of unknown sex. No known individual was identified. No associated funerary objects are present.
